

Anchor Financial Planning - Astra vs Gemini

CivilWork-style comparison of the submitted Astra and Gemini webapps. Direct file navigation and external CDN loading are restricted here, so the app screenshots were rendered in Chromium from each submitted HTML/CSS with the local images embedded and a compact Bootstrap-compatible layout layer. They show the source-supported styling differences, but are not claimed as exact production/CDN renders.

Desktop comparison - where the submissions differ

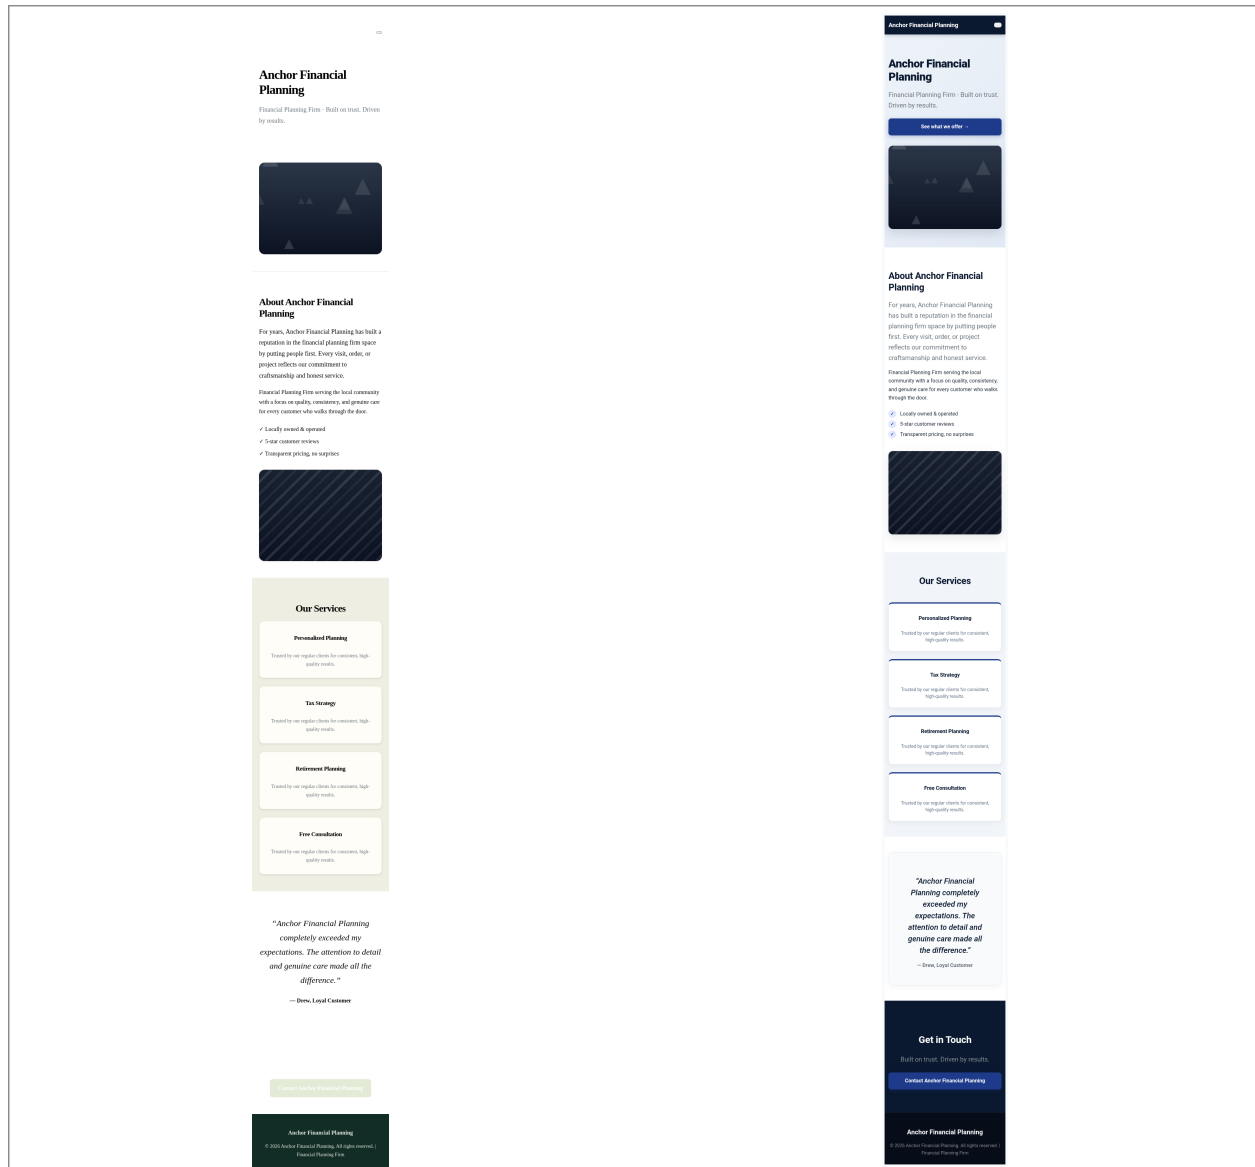

Key source differences: Astra uses a green/cream financial palette and Manrope, responsive 4:3 hero/about images, simpler service/testimonial presentation, and explicit focus-visible outlines. Gemini uses a navy/blue palette, Outfit headings with Plus Jakarta Sans body text, fixed-height hero/about image classes, equal-height service-card structure, a contained testimonial card, and full-width mobile call-to-action buttons.

Mobile comparison - narrow-screen treatment
