

Canvas & Clay Studio - Astra vs Gemini UI Comparison

Task: Change the background color, fix overlapping/alignment issues in the layout, and change the font family.

Key visual difference - hero/header

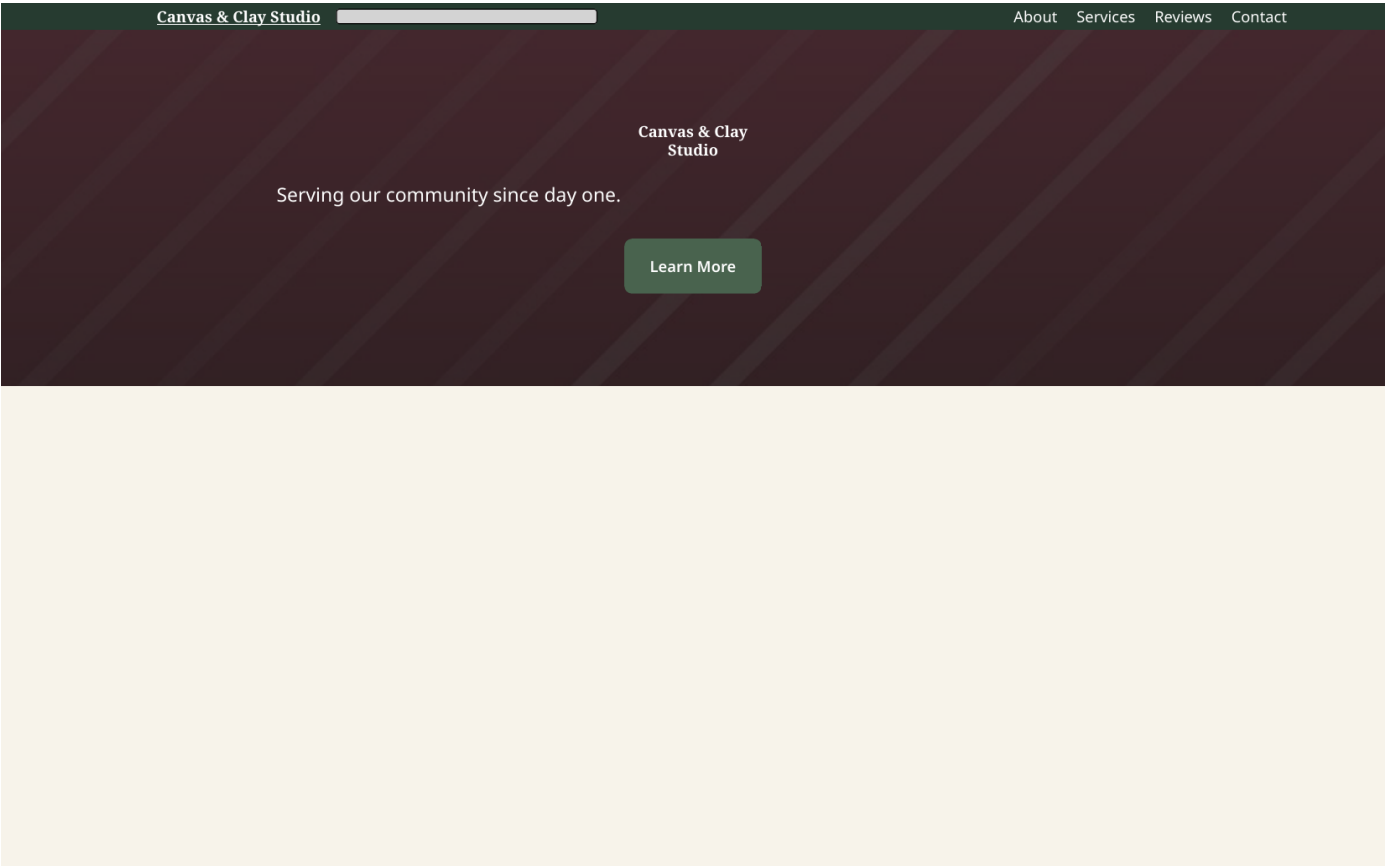

Astra

Gemini

Astra uses a green/cream visual system with a green CTA. Gemini uses a darker brown header and warm terracotta CTA, with different spacing and typography treatment.

Webapp after UI changes using Astra

Astra hero/header view showing its background, navigation spacing, centered hero copy, and green button treatment.

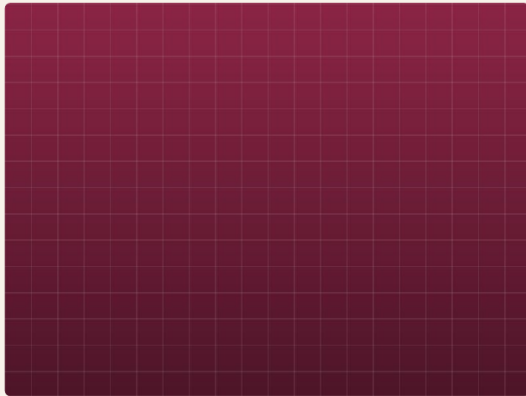

Astra - About section alignment

About Canvas & Clay Studio

For years, Canvas & Clay Studio has built a reputation in the art studio space by putting people first. Every visit, order, or project reflects our commitment to craftsmanship and honest service.

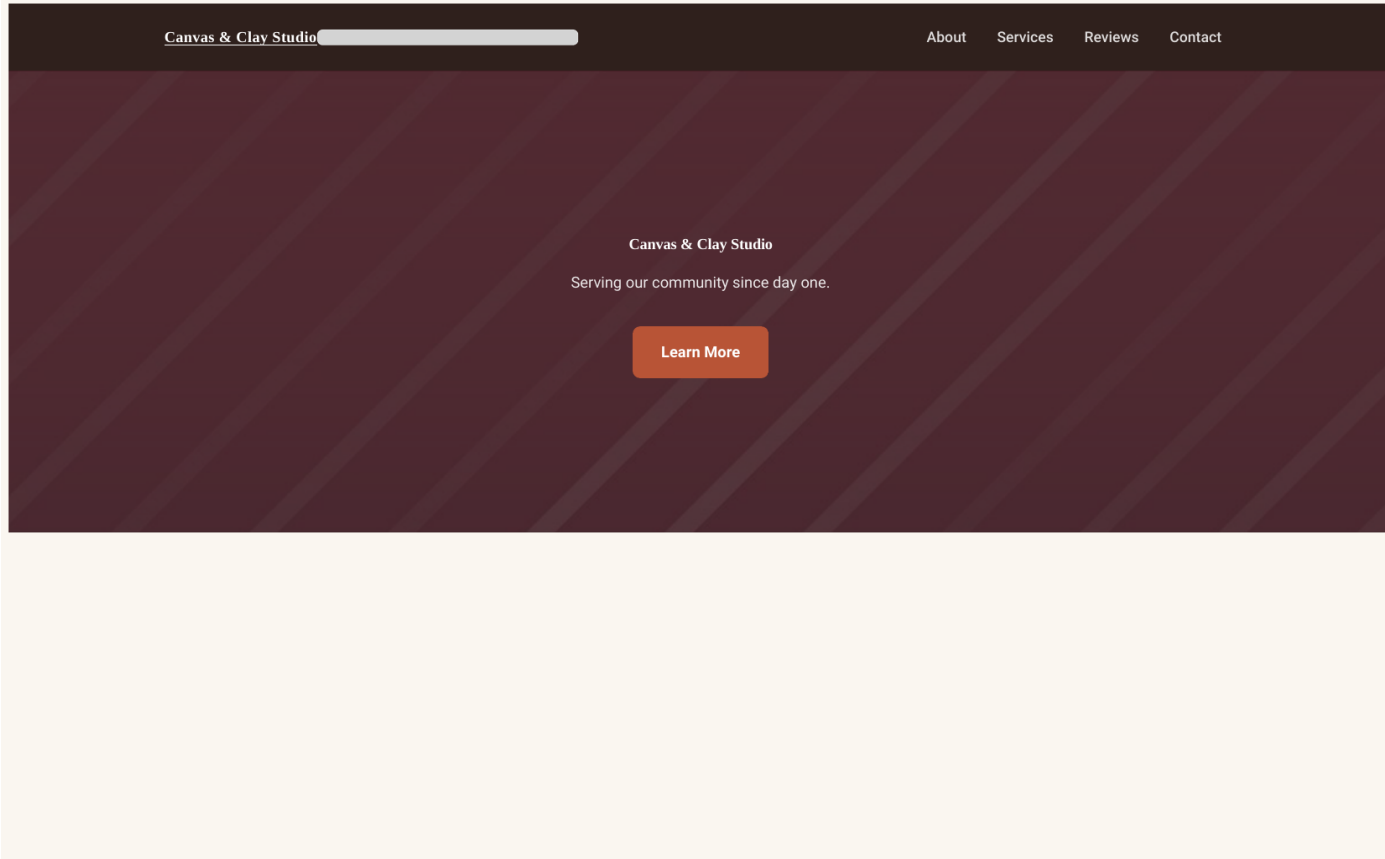

Art Studio serving the local community with a focus on quality, consistency, and genuine care for every customer who walks through the door.

- ✓ Satisfaction guaranteed
- ✓ Fast, reliable turnaround
- ✓ Personalized attention to every client

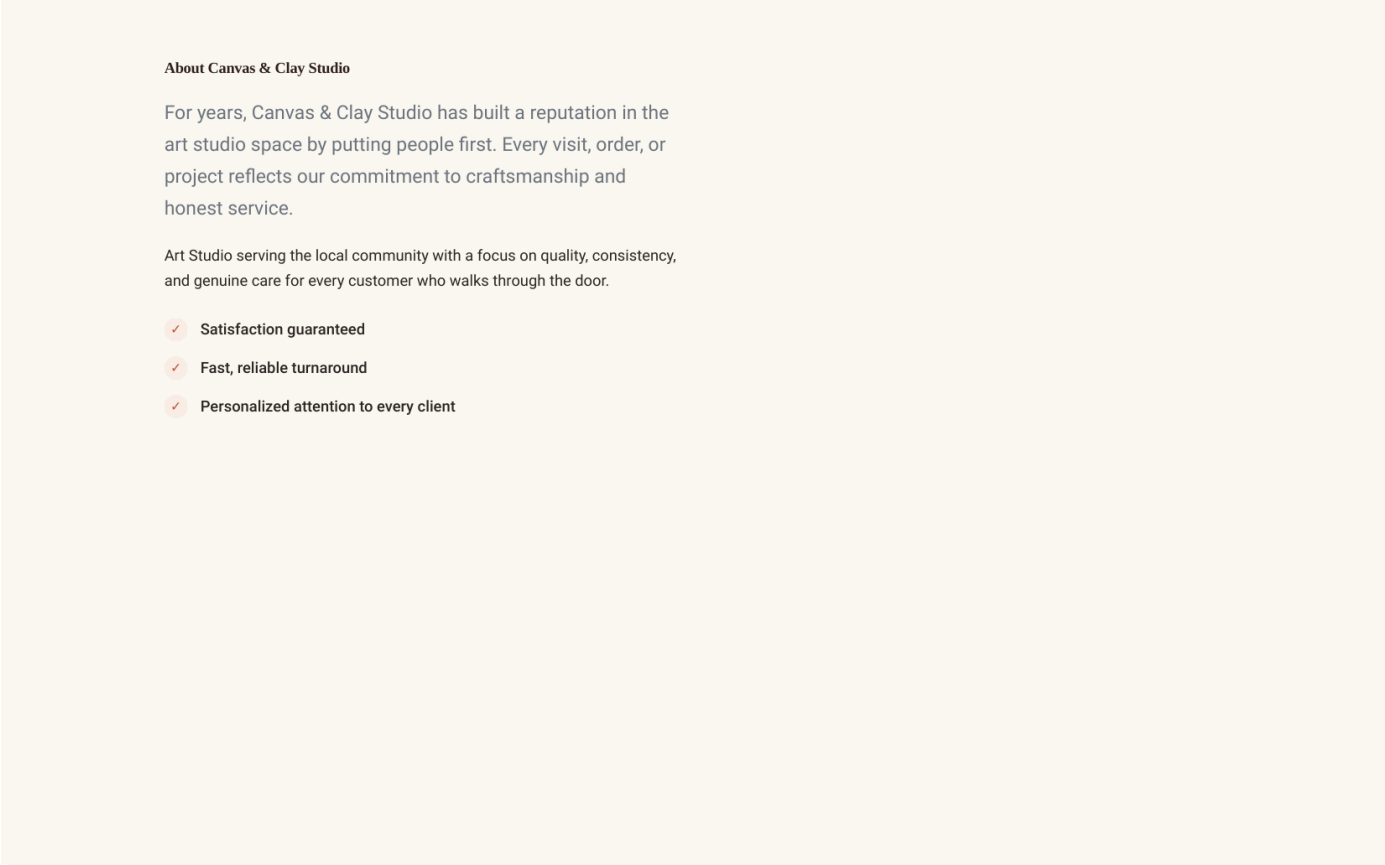

Astra keeps the About copy, checklist, and image in a stacked rendered flow with plain checkmarks and a warm cream page background.

Webapp after UI changes using Gemini flash

Gemini hero/header view showing its darker navigation surface, warm accent button, and altered spacing/typographic hierarchy.

Gemini flash - About section alignment

Gemini applies a different About treatment with larger lead text and styled circular checklist markers, making the source-level UI changes visibly distinct from Astra.
