

Majestic - Astra vs Gemini UI Comparison

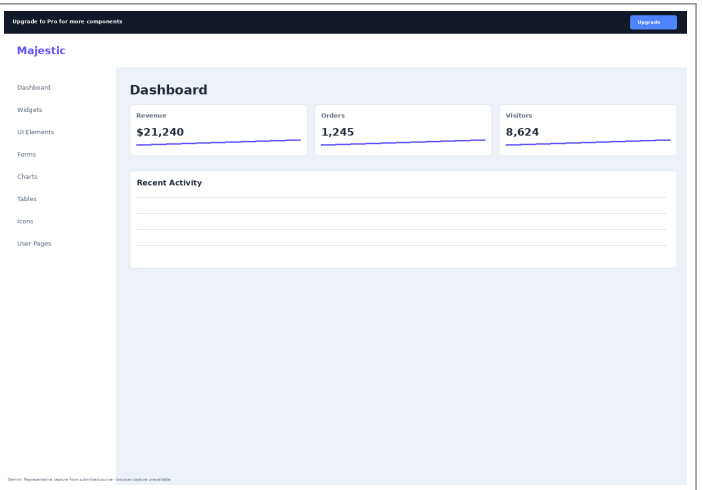

CivilWork-style report focused on source-supported differences in the newly supplied Majestic ZIP. Gemini adds Google-font loading (Plus Jakarta Sans / Inter), a sidebar backdrop element, a broader typography override, different background/card treatment, and explicit Pro-banner/sticky-navbar coordination. Astra uses a Segoe UI/system stack with its own shared visual refresh. Local Chromium screenshot capture did not complete, so the app pictures below are explicitly labeled representative captures; direct code-diff screenshots are from the submitted files.
