

Master Webapp - Astra vs Gemini

CivilWork-style comparison from the submitted Astra and Gemini folders. A direct source comparison found the final shared app-theme.css to be identical, while the template HTML differences are primarily line-ending/format normalization. Accordingly, this report does not invent a visual winner or claim a meaningful final UI difference that the source does not establish.

Submitted application views

Astra

Gemini

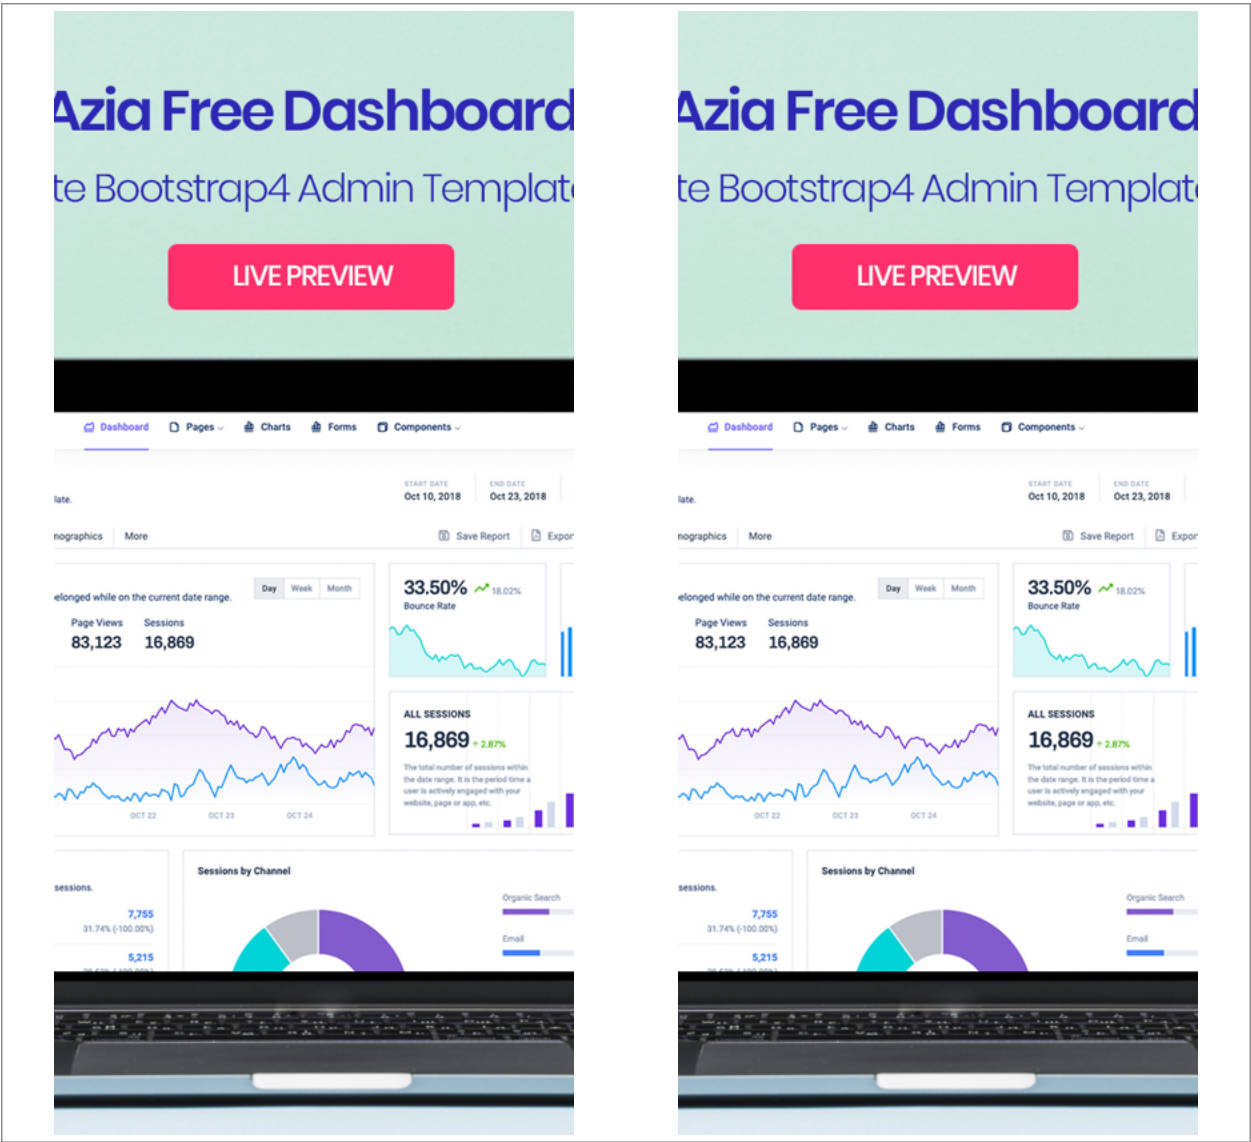

Both submissions apply the same shared background, Segoe UI font stack, card styling, dashboard wrapping/grid rules, chart spacing, table spacing, footer wrapping, and two-column mobile metric grid. Because these final rules match, no source-supported Astra/Gemini UI difference is highlighted here.

Narrow-screen representative views

Astra

Gemini

These are representative narrow crops of the submitted project screenshot, not browser-verified mobile renders. The source itself uses the same mobile dashboard rule in both submissions.

Direct code comparison

MASTER - DIRECT ASTRA / GEMINI SOURCE COMPARISON

css/app-theme.css

Result: IDENTICAL in Astra and Gemini.

Shared changes include:

```
--app-background: #edf2f8;
--app-font: "Segoe UI", "Helvetica Neue", Arial, sans-serif;
.card { border-radius: 10px; box-shadow: 0 3px 12px ... }
.card-dashboard-one .card-body-top {
  position: static;
  display: grid;
  grid-template-columns: repeat(4, minmax(0, 1fr));
  gap: 16px;
}
@media (max-width: 767px) {
  .card-dashboard-one .card-body-top {
    grid-template-columns: repeat(2, minmax(0, 1fr));
  }
}
```

template/index.html

Only newline/line-ending formatting differs around the stylesheet link.
No meaningful UI implementation difference is established.

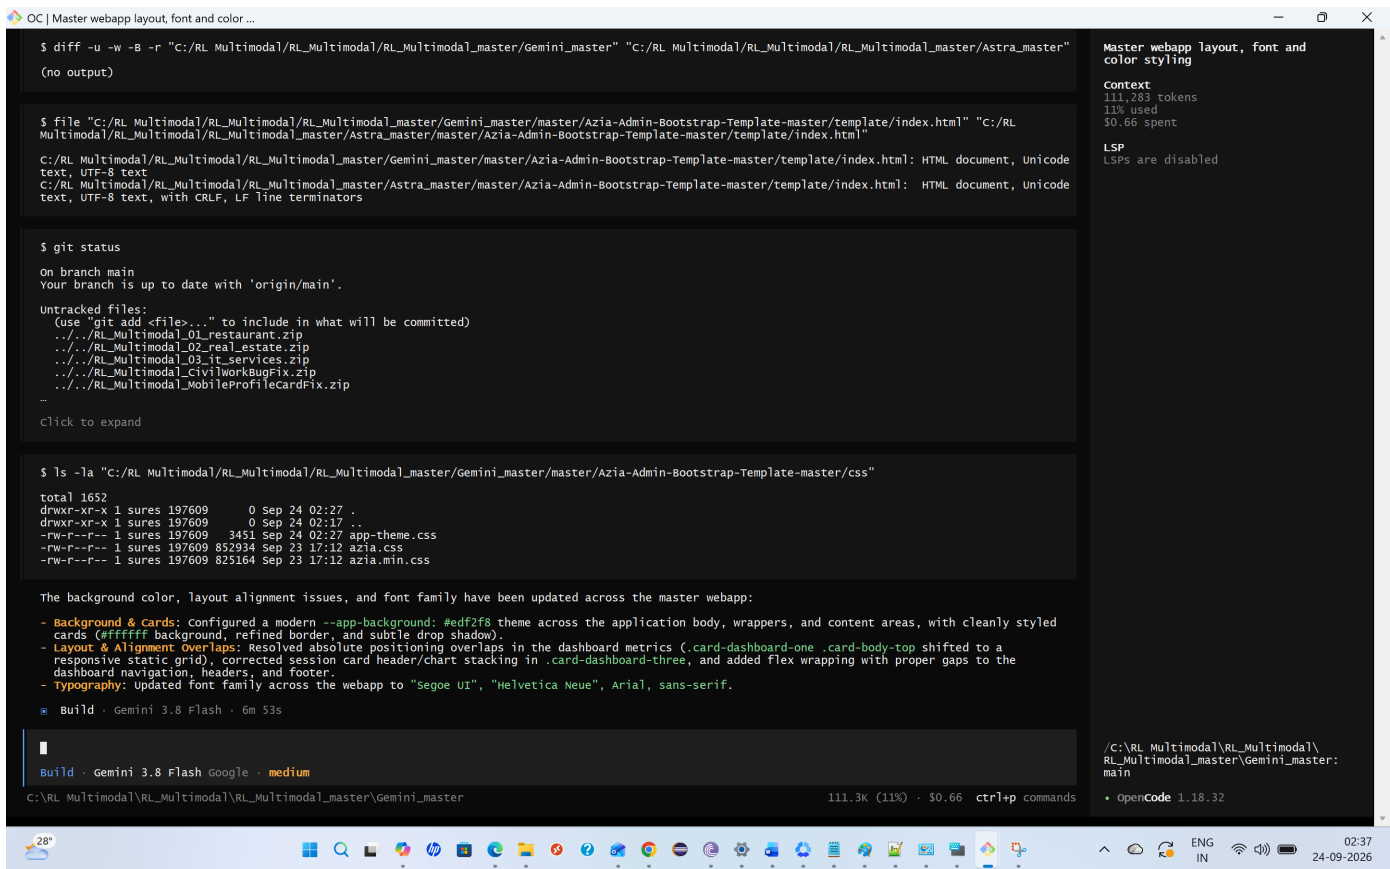

Other template HTML files differ primarily by line-ending/format normalization.
Therefore the submitted final app implementations do not establish a
meaningful Astra-vs-Gemini visual difference to highlight.

}
```

The supplied Astra evidence shows the added shared app-theme.css and its dashboard layout, background, font, card, and responsive rules.

Gemini session/code evidence

The supplied Gemini evidence reports the same shared theme changes: #edf2f8 background, card styling, alignment/overlap fixes, and Segoe UI font family.

Astra: rollout-2026-09-24T02-19-08-01a0d007-8452-7692-9b88-f3a5edb2d7ac.jsonl

Gemini: transcript.json

Comparison conclusion: the submitted final Astra and Gemini app-theme.css files are identical and the inspected template differences do not establish a meaningful user-facing implementation difference. This PDF therefore documents the shared final changes and the supplied code evidence without claiming unsupported visual superiority.
