

PolluxUI - Astra vs Gemini UI Comparison

Local Chromium and HTML rendering did not complete for this large dashboard bundle. The app images below are representative captures generated from the supplied final HTML/CSS and are labeled accordingly; code-change screenshots are direct diffs of the supplied files.

Desktop comparison - changed dashboard treatment

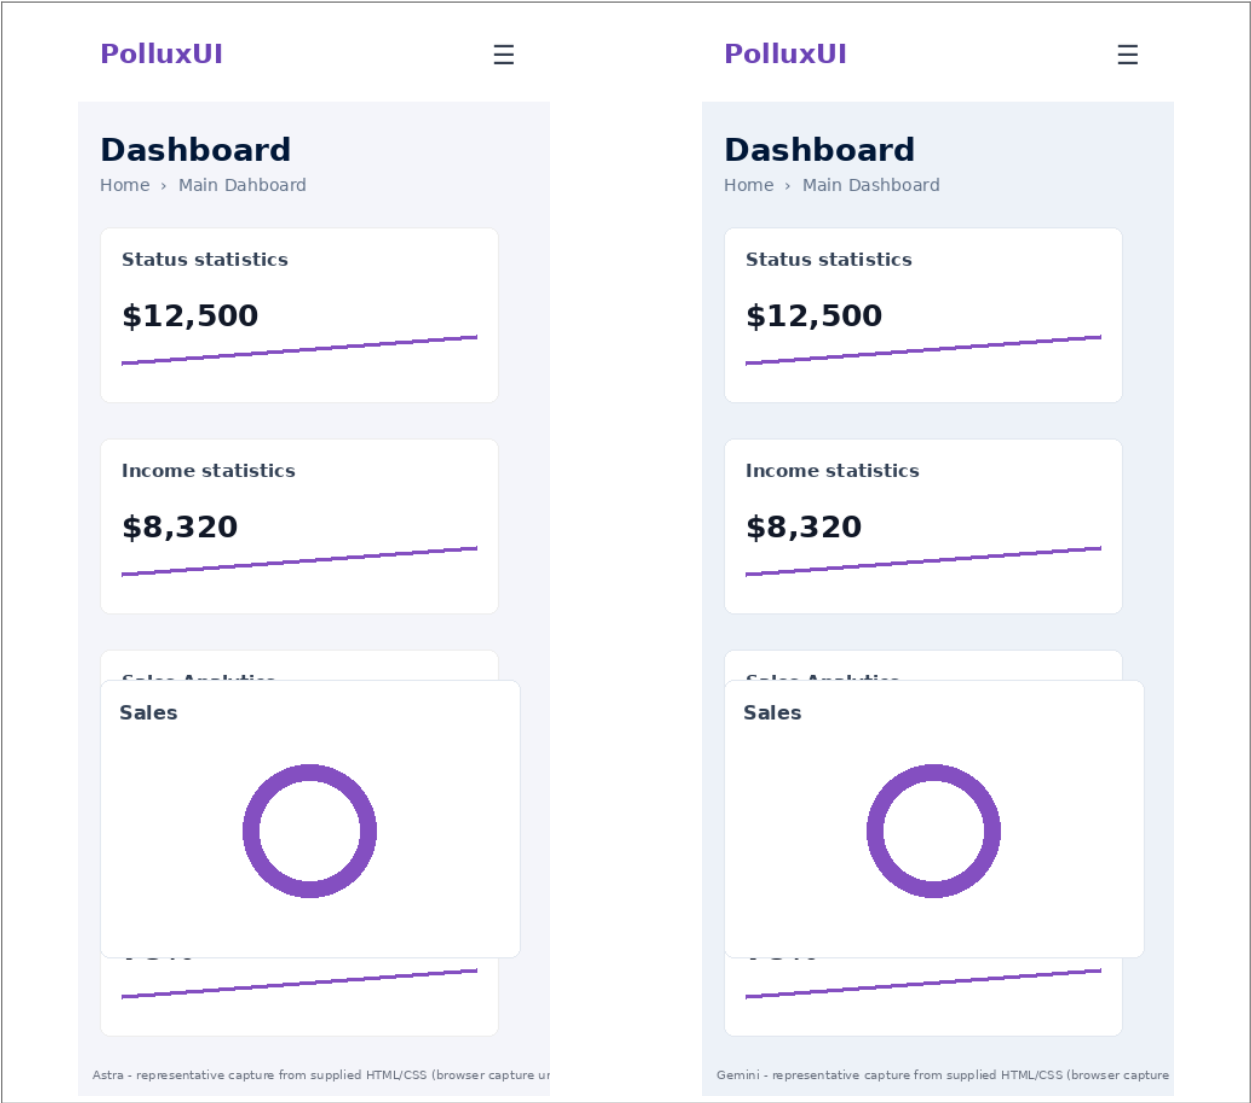

Gemini changes the dashboard background to #edf2f8, switches typography to Segoe UI/system fonts, restyles cards/sidebar, fixes local asset paths and changes several responsive grid/chart rules. Astra retains the alternative submitted treatment.
